KNOTWOOD™

It's Not Wood, It's Aluminum

Aluminum Decking

Your home and what you put on it are an investment. A deck, veranda or patio can add huge value to your home... if it's kept clean and safe. You don't have to worry about the 'ifs' by choosing Knotwood decking.

You'll know your decking is safe because it's made from high-quality marine grade aluminum and can't rust, rot or crack. It has a durable finish backed by a limited lifetime warranty, so you don't have to worry about it fading, chipping or going chalky. The deck doesn't require expensive and time-consuming maintenance. You will get exactly the color you wanted because you picked from a huge range of woodgrain and solid colors. And you know that if there's a fire, your Knotwood deck will hold up to the assault.

Take the risk out of your investment, and make the smart choice like thousands of others around the world; choose Knotwood Decking for your home.

Knotwood Colors

All Knotwood colors have been tested to withstand the most extreme environments and uphold the highest finishing standards in the world including the Australian, American and European standards. Backed by a limited lifetime warranty, it's no wonder Knotwood's award winning finish is coveted the world over. With a full range of color matched accessories available you can ensure a clean, uniform finish that will leave you breathless.

Please note: These colors are a guide only contact our office for samples. Please be aware that Knotwood contains natural color variation consistent with that of real timber.

Powdercoat Colors

If you want the reliability and consistency of a solid color, you can't go past our huge range of powder-coat colors. With the full range of colors on hand and a library of hundreds of custom colors only a phone call away, you can have exactly the look you want. All of our solid colors carry the same limited lifetime warranty as our premier woodgrain finish and are all applied by our experienced and accredited applicators to ensure you get the gold-standard of quality you deserve.

Frequently Asked Questions

Q. Does it get slippery when wet?

A. Surprisingly Knotwood decking isn't slippery when wet. It's suitable for most covered and dry areas. For use around swimming pools and similar areas usually wet, we recommend an extra 'anti-slip' coating. Which can be purchased from any typical hardware store.

Q. I have pets, does it scratch easily?

A. It is similar to timber in this regard. Heavy sharp objects moved across the surface can damage the finish, but normal wear and tear is unlikely to permanently damage the finish. If a deep scratch does appear, touch-up paints color matched to the timber grain color can be provided upon request.

Q. Does it get hot to walk on in the full sun?

A. Aluminum has great heat dissipation properties. It will heat up during the day but the powder coat layer insulates the metal. Generally it will be no hotter than a timber deck, even during the heat of the day. The difference is that aluminum can cool extremely rapidly, within a minute of being in the shade it will cool completely.

Q. What spacing do my joists need to be at for this material?

A. 16" Centers is what the system was designed to operate safely under.

Q. I don't want to see the joist at the ends of my deck, do you have something I can use to cover them?

A. YES! We have a two-part slat system which can face fix to joists to hide them. Handy hint, they can also be used as stair risers.

Our
RANGE

VARIABLE BOARDS

Interlocking Decking boards are available in 18'-6" lengths. Featuring Knotwood's unique interlocking system, these boards provide the best finish money can buy.

We also have a great 2-part slat system, that can face fix to any frame you require. They are 5/8" thick when put together. The smooth finish is ideal for a slick look.

WHY KNOTWOOD

Knotwood's extruded boards and interlocking design ensure it is one of the easiest to install decking products on the market today. The fast installation time, huge range of finishes, low maintenance requirements and long life make Knotwood decking the smart choice for both residential and commercial applications.

FINISHING PIECES & ACCESSORIES

Knotwood decking is a system with a full range of finishing angles and clips to conceal the fasteners. See the install guide for more information or visit our website.

SUITABLE APPLICATIONS

Schools, colleges and Universities Leisure centers, boardwalks, verandas and patios, parks, courtyards, gardens, poolside decks.

Easy Installation

We strive to make Knotwood as easy, simple and efficient as possible. All of our Installation guides and technical manuals are readily available.

Each manual contains step-by-step instructions and product codes. You can train yourself in minutes and our sales team are always on hand to answer any questions you might have.

You can find the full list of guides by going to our website www.knotwood.com.

Our
PRODUCT

01 Raised deck - Sydney, AUS

The dark timber tones of this second-floor deck in Sydney was exactly what this renovation needed. Not only did the deck create more space for the otherwise small home, but it added a 'wow factor' when entering the property. Definitely the high-light of the renovation, this area is used year round.

02 Atlantic Cedar deck - Ballina, AUS

This Giant Deck in Ballina, NSW, is testament to the low maintenance properties of Knotwood's Decking. The sheer size of the project made timber an impractical option as it would need almost constant maintenance to keep it safe and looking good. By using Knotwood, this family got exactly what they needed. A safe area for the family to gather that blurred the line between outdoors and in.

03

Light Oak outdoor area – Dorset, UK

This quaint outdoor entertaining area makes the most out of the limited space. The light yellow of the decking nicely contrasts with the red-brick house without detracting from the beautiful lawn area. The owners of this Dorset home can entertain guests in summer and not worry about the deck being damaged through the cold and wet months of the winter.

04

Deck & alfresco area - Brisbane, AUS

Overlooking the neighbourhood for a stunning view of the pool and BBQ area below, there is no better place for this Victorian couple to entertain their guests. Great lighting in this small yard make the most of the space and the alfresco area under the deck is great for relaxing next to the pool.
